

SUNK AFTER COLLISION

Fog Cause of Accident Off Boston Yesterday

ALL THE CREW WERE SAVED

Lighter Bound from Philadelphia to Boston Was Struck Broadside and Sank Just After Men Were Taken Off in Life Boat.

Boston, Jan. 23.—The Savannah Line steamer, Nacoochee arrived this morning with the captain and crew of the steamer Trojean, bound for Philadelphia from Boston, which was sunk yesterday by the Nacoochee off Gayhead in the dense fog. Yesterday afternoon the steamers were slowly picking their way along when the collision occurred. The Trojean was struck broadside and sank soon after the Nacoochee drew away. The officers and crew of the Trojean were taken off in a life boat. The Trojean had a full cargo of freight. The loss on the steamer is estimated at \$200,000 and the Nacoochee was only slightly damaged. None of the officers or crew of either vessel was injured.

RUSSIANS PARADED.

Sang the "Marseillaise" and Marched to Faneuil Hall in Boston.

Boston, Jan. 23.—To the stirring strains of the "Marseillaise," more than 3,000 former subjects of the Russian emperor marched through the streets of Boston last night and later held an enthusiastic mass meeting in Faneuil hall in memory of their countrymen who fell in St. Petersburg on "Red Sunday," a year ago yesterday.

The demonstration, which was under the auspices of socialistic organizations in the city, was remarkable. The parade was peaceful and there was absolutely no display of violence further than the inscriptions on the many banners and the utterances of the speakers at the Faneuil hall meeting.

The personnel of the paraders was as cosmopolitan as a parade of Russian subjects could be. There were in line, Russians, Russian Jews, Armenians, Poles, Lithuanians and Finns. Singing and cheering and waving their red flags they marched from Castle square in the south end through the center of the city to Faneuil hall.

A BATTLE IN CHINA.

Chinese Regulars Defeated with Heavy Loss by a French Force.

Marseilles, Jan. 23.—Chinese mail which arrived here yesterday brought an account of the invasion of Tonkin, French Indo-China, by Chinese regulars, who encountered a French force numbering 400 men, of whom 150 were Europeans. A three hours' battle ensued, resulting in the defeat of Chinese, who lost 300 killed and 300 wounded. The French lost 16 men and 20 foreign legion and 29 Annamites killed.

SAP IS RUNNING.

Is Report From Milton—Ice Breaking Up in Lake.

St. Albans, Jan. 23.—Ice is breaking up in St. Albans Bay and is moving into the shore. Two miles out it looks as if the water is running clear. The Mississippi river is clear of ice from Richmond to the mouth of the river, a distance of 40 miles. It is reported that sap is running in Milton. The temperature here today is from 62 to 64 degrees, and in Enosburg Falls 67 is reported.

LYNCHED IN THE STREET.

Negro Hanged by Mob of 300 in Hopkinsville, Ky.

Hopkinsville, Ky., Jan. 23.—A mob of three hundred men early on Sunday morning took Ernest Baker, a negro, from the county jail and hanged him from a beam of the city scales, near the court house, in the center of the city.

Saturday night Baker attempted a criminal assault on Miss Mary Gentry, aged eighteen, whom he knocked down and dragged by the heels into an alley. Her screams attracted neighbors, and the negro fled, but later was captured. The mob's work was so secretly done that the prisoners in the jail next to Baker did not know of the lynching.

BUT BRIEF REFERENCE.

Poultry Bigelow Touched Upon Panama in Providence Lecture.

Providence, R. I., Jan. 23.—Poultry Bigelow, who was recently before the United States Senate committee on inter-oceanic canals concerning his statements regarding sanitary, moral and other conditions in connection with the construction of the Isthmian canal at Panama, made but brief reference to the matter last night, when he delivered a lecture at Brown university on "The Spread of the Mongolian Races."

Previous to his discourse upon this topic he stated that on account of his dismission from the Boston university he had been absolutely sure of a welcome at the local institution. In discussion of his subject Mr. Bigelow stated that the greatest economic question now confronting the government at the isthmus was the importation of Chinese coolie labor, and he thought that if the Chinese were brought over to the isthmus and to work there under conditions similar to those obtaining in India and other British colonies where good results had followed, they would be used to good advantage.

In touching upon this he added that the coolie labor might be profitably put to work after clearing the land of swamps to make it habitable was first accomplished.

TOO MANY GOVERNORS.

Worked to the Bad for Porto Rico, Said Mr. Todd.

Washington, Jan. 23.—Roberto H. Todd, mayor of San Juan, Porto Rico, continued his statement before the house committee on insular affairs yesterday in support of the Larrinaga bill to reorganize the insular government in Porto Rico. He said there had been three governors in five years and five attorneys general. All these five heads of the local department had been from different parts of the United States, and had interpreted the laws of Porto Rico according to the decisions of the courts in their respective states.

As the court decisions of the island had not been published, Mr. Todd said they were a hopeless tangle. The heads of other departments, Mr. Todd said, also had changed frequently, and the result was disastrous to the interests of the islanders.

Mr. Todd said a great deal of money was wasted by the insular government in salaries, particularly for superfluous clerks.

HOUSE COMMITTEE POSTPONES.

Action on the Presentation of a Railroad Rate Bill.

Washington, Jan. 23.—The House committee on interstate and foreign commerce which was to have voted today on committee on the railroad rate regulation bill to the House, has again postponed action. There will be a private meeting of the committee this afternoon or probably tonight in the interests of a unanimous report by both the majority and minority.

WILL BLOCKADE VENEZUELAN PORTS.

French Vessels Are Now Being Collected to That End—United States Is Said to Have Given Consent.

Washington, Jan. 23.—France will blockade the Venezuelan coast. It is learned that orders to this effect have been prepared at the naval office in Paris for transmission to the squadron now in Caribbean waters. This information comes from an unquestioned diplomatic authority in this city. The blockade will be established within a week or ten days, just as soon as the proper number of vessels can be assembled off the Venezuelan coast.

The blockade will be done with the full consent of the United States, France having given assurances that neither the letter nor the spirit of the Monroe doctrine shall be violated.

CRY FOR INVESTIGATION.

Various State Departments in New York Under Fire.

Albany, Jan. 23.—It was investigation night in the legislature last night. Resolutions calling for legislative investigation of various state departments appeared in both houses and in the assembly a letter from Bank Superintendent Kilbuck to Speaker Wadsworth virtually asked for an investigation of his department and the committee on banks will report next week a resolution providing for such an investigation.

In the Senate, Senator Marks introduced a resolution calling for a sweeping investigation of the insurance and bank departments and corporation and franchise of the comptroller's office, the committee being empowered by the resolution also to investigate the administration during the past five years of any other department of the state government which the committee may decide should be investigated. The Marks resolution was referred without comment to the Senate committee on finance.

A PECULIAR SUICIDE.

Young Woman Made a Torch of Her Own Body.

Elmira, N. Y., Jan. 23.—Miss Katie Van Valkenburg, 27 years of age, a school teacher at Newfield, Tompkins county, returned to her father's home at Vanhookville, Chemung county, recently suffering from nervous trouble. Yesterday during the temporary absence from the house of her father and sister she saturated her clothing with kerosene oil and turpentine and going into the garden applied a match to her skirts. She was quickly enveloped in flames and as she moved about the garden was seen by neighbors who extinguished the flames. The young woman was severely burned and lived but a short time. She did not lose consciousness and did not complain of the burns. She was a member of one of the oldest and best known families in this section.

DENIES IDENTIFICATION, SAYS HE'S FRANK STEVENS

Sheriff Sprague's Capture Was Identified However, as Man Was Represented Himself to Be a Speculator.

Chelsea, Jan. 23.—The man arrested Sunday by Sheriff W. H. Sprague at South Washington was identified yesterday afternoon by W. H. Forsyth of Tunbridge, Horace Gueha of Tunbridge and William H. Hill of Chelsea as Frank E. Chase, who early in November was around here, representing himself as a speculator. The speculator stopped over night with Mr. Forsyth and the latter was thereafter minus \$15 in money, a mackintosh and a pair of gloves. The prisoner, however, claimed to have never seen the three men before and that he could prove himself to be Frank Stevens as he said he was when arrested.

Sheriff Sprague has communicated with State's Atty. M. M. Wilson who has set Saturday the 27th inst., to bring the accused and accusers before Justice John M. Constock at the court house when the line light of identification will be turned on to determine whether or not the sheriff has correlated the real article or not.

THE ISLES OF BERMUDA

Mayor Barclay Writes Interestingly

OF SCENES AND THINGS

Describes Climate, Scenery and Attractions in General as Seen by Him in His Travels While Seeking Renewed Health.

Bermuda Islands, Jan. 16, 1906.

Editor Times: In closing my last letter to you, I said I would give you a description of the old town of St. George, also how they quarry and cut the coral rock, etc. Think to do this subject better justice, I will give you readers a little information as to the discovery and pooling of the islands. Then will give you our daily rambles, and describe them as we go along. There is so much, that one cannot describe it at one sitting.

Have been in conversation with some of the old inhabitants, also looked up some old history of the place regarding dates. I find the Bermudas were first discovered in 1515 by a Spanish vessel La Garza, on a voyage from Spain to Cuba with a cargo of hogs, commanded by Juan Bermudez, and Gonzalez Ojeda the historian of the Indies to whom we are indebted for the first account of these islands; they were not inhabited at that time. They resolved to send a boat ashore, and leave a few hogs which might breed and be afterwards useful. While preparing to do so, a strong gale arose which obliged them to sheer off and be content with what they had learned. The Spaniards named the islands Bermuda after the captain. Philip II of Spain granted the islands to one Ferdinand Canalejo, a Portuguese, who landed in 1543. All he did, was to cut his initials on the rock also the year he landed. They were afraid to approach them for the stormy seas and dangerous reefs. The Spaniards called them the "Devil's Islands."

They first came to the notice of the English by a dreadful shipwreck in 1591. Henry May and Captain Lancaster went on a buccanering expedition to the West Indies, but as it was in possession of the Spaniards, they dared not approach. In nearing Bermuda strict watch was to be kept; while they supposed themselves near the spot, the Pilot said they were twelve leagues south of it, so they threw aside all care and gave themselves up to carousing all night, the ship struck with such force that she immediately filled and sank. In the wild and desperate struggle that followed, May fortunately got into a boat with others and landed after enduring some terrible hardships. The land was covered with the bones of the crew of cedar. Here they would have to remain for life unless a vessel could be constructed. They made a trip to the wreck, secured some carpenter's tools, shrouds and some tacks; with these they cut down cedars and constructed a vessel of 16 tons. During the residence of five months, May had observed Bermuda, supposed to be a single island, was broken up into a number of islands of different sizes enclosing many fine bays and forming good harbors. May arrived in England in August, 1594, where he gave a description of the islands; he stated that they found hogs running wild all over the islands which proved that this was not the first landing made there. In 1609, during the most active period of the Colonization of Virginia, an expedition of nine ships, commanded by Sir Thomas Gates, Sir George Somers and Captain Newport bound for Virginia, was separated by a great storm. One of the vessels, the Sea Adventure, in which was Gates, Somers and Newport, seems to have been involved in the thickest of the tempest. The vessel sprung a leak; all hands labored at the pumps for life. The islanders, he stated that they found hogs running wild all over the islands which proved that this was not the first landing made there.
